

G10 Math 3rd Monthly Assessment Evaluation Criteria

Part 1 Report—For Teachers to evaluate (Maximum: 20)

R1-Punctuation (1)

- 1: on time
- 0: late

R2-Presentation (4)

- 4: The report is complete, coherent, well-organized and concise.
- 3: The report is coherent and well organized.
- 2: The report has some coherence and shows some organization.
- 1: The report has some coherence or some organization.
- 0: The report does not reach the standard described by the descriptors above.

Note: This criterion is a holistic judgement of the whole report— whether all the components of the worksheet are covered (complete) and logically connected to each other (well-organized); whether the report is easy to follow (coherent); and whether the report contains all relevant and necessary working (concise).

R3-Mathematical Communication (4)

- 4: The mathematical communication is relevant, appropriate and consistent throughout.
- 3: The mathematical communication is relevant, appropriate and is mostly consistent.
- 2: The report contains some relevant appropriate mathematical communication.
- 1: The report contains some relevant mathematical communication which is partially appropriate.
- 0: The report does not reach the standard described by the descriptors above.

Note: This criterion focuses on the accuracy and appropriateness of mathematical communication — whether the report employs tables, diagrams and/or charts with clear description and interpretation wherever needed; whether the symbols, notations and formulas are presented in appropriate forms; whether variables used are clearly defined, etc.

R4-Engagement (3)

- 3: There is evidence of outstanding engagement.
- 2: There is evidence of significant engagement.
- 1: There is evidence of some engagement.
- 0: The report does not reach the standard described by the descriptors above.

Note: This criterion assess the extent to which the team use data in effective ways, think creatively, present mathematical ideas in their own way, analyze and solve the problem from different perspectives, etc.

R5-Reflection (3)

- 3: There is substantial evidence of critical reflection.
- 2: There is evidence of meaningful reflection.
- 1: There is evidence of limited reflection.
- 0: The report does not reach the standard described by the descriptors above.

Note: This criterion assesses how the team review, analyze and evaluate the working and results— whether there are assumptions and justifications to simplify the problem; whether the data used are reliable; whether the method applied is relevant; whether the results obtained are reasonable; how could the model be applied in alternative situations; etc.

G10 Math 3rd Monthly Assessment Evaluation Criteria

R6-Use of Math (5)

- 5: Relevant mathematics is used. The results are correct and justified. Thorough knowledge and understanding are demonstrated.
- 4: Relevant mathematics is used. The results are mostly correct and partially justified. Good knowledge and understanding are demonstrated.
- 3: Relevant mathematics is used. The results are mostly correct. Some knowledge and understanding are demonstrated.
- 2: Relevant mathematics is used. Limited knowledge and understanding are demonstrated.
- 1: Some mathematics is used.
- 0: The report does not reach the standard described by the descriptors above.

Note: This criterion assesses how well the team apply relevant mathematics; how the team make clear by reasoning or evidence, illustrating the examples or practical application of the knowledge and understanding; how the team arrive at and justify the result using appropriate approaches, etc.

=====

Part 2: Presentation—for peers to evaluate (Maximum: 10)

P1-Presentation (for each individual member)

- 4: The presentation is very clear and easy to follow.
- 3: The presentation is clear and mostly easy to follow.
- 2: The presentation is somewhat unclear and not easy to follow.
- 1: The presentation is very unclear and difficult to follow.

P2-Result (for the team)

- 6: The content is well-organized, the process is logical, and the results are meaningful and practical.
- 5: The content is organized, the process is logical, and the results are meaningful or practical.
- 4: The content is mostly organized, the process is mostly logical, and the results are meaningful or practical.
- 3: The content shows some organization, the process shows some logic, and the result makes some sense.
- 2: The content shows some organization, the process shows some logic, or the result makes some sense.
- 1: The content is not organized, the process is poor, and the result does not make sense.
